Seth Hackley

Alpine, CA 619-552-0427 | skh1994@pm.me | https://www.linkedin.com/in/seth-h-3876a361/

SUMMARY

ISTQB-certified Software QA professional with over four years of cumulative QA experience across Qualcomm Technologies and Stanford University. Experienced in manual and automated testing, test-case generation, boundary testing, defect reporting, and technical documentation. Hands-on experience integrating AI tools into development and documentation workflows, including Gemini, Claude, ChatGPT, and GitHub Copilot. CompTIA A+ certified with additional experience in Linux administration, application debugging, and reverse engineering.

RELEVANT WORK EXPERIENCE

Personal Project: Across Age Reborn Android Port | November 2026 – Present
• Reverse engineered legacy Android APK using apktool to decompile Dalvik bytecode into readable source
• Analyzed and modified obfuscated Java code to patch license verification and purchase authentication logic
• Updated AndroidManifest.xml for modern Android compatibility including API 34 targeting, scoped storage compliance, and Android 12+ exported activity requirements
• Troubleshot SELinux context restrictions on Fedora Linux to resolve container file access permissions
• Collaborated with AI tools including Claude and Antigravity AI to analyze decompiled source and plan code modifications
• Documented all patch modifications for reproducibility and future feature development

Personal Project: Linux Media Server Admin and Architect — Jellyfin | July 2026 – Present
• Deployed and configured a self-hosted Jellyfin media server in a Linux environment.
• Configured networking, user access, media libraries, permissions, and server services.
• Troubleshot application, network, and client-side issues.
• Maintained and updated the server while documenting configuration and troubleshooting procedures.

Personal Project: AI Companion-Assisted Development & Technical Troubleshooting | 2024–Present
• Configured and customized AI companion applications through prompt engineering to assist with software development, code analysis, debugging, and technical troubleshooting.
• Leveraged AI-assisted code analysis to investigate persistent programming issues, examine unfamiliar code, and identify potential root causes and solutions.
• Supplied AI companions with technical documentation for a proprietary programming language to assist in developing complex functions involving interdependent variables and application logic.
• Integrated and tested AI-generated code, validating expected functionality through positive and negative testing, including changes to global-variable conditions.
• Utilized AI-assisted analysis to investigate suspicious system behavior and potential malware infections, independently researching and evaluating recommended diagnostic and remediation tools.
• Evaluated AI-generated recommendations against observed system behavior, testing proposed solutions and verifying results before implementation.

Zavikon, Calabasas, CA **July 2024 - February 2025**
Intern placement at Stanford University - DevOPS Testing, Endpoint Engineering & Development
• Developed Gitlab Summarizer integrating Gemini AI to produce summary reports
• Utilized GitHub copilot plugin with VSC to train in software debugging utilizing various languages.
• Performed Test Case Generation and Analysis to create End User Documentation
• Executed test cases for programs and applications developed by EED and DevOPS Team
• Generated Flowcharts for Project Lifecycle
• Performed Manual Testing of Campus App
• Created Root Cause Analysis Template
• Created Project Requirement Template

Manpower San Diego, San Diego, California **April 2019 - December 2022**
Testing Technician, placement at Qualcomm Technologies
• Wrote test cases for software in development
• Executed test cases for software under development
• Wrote bug reports for defects found when testing software
• Presented findings to project manager and emailed project summary to development team
• Created product documentation for distribution to clients
• Oversaw automation and reported failed test scripts
• Programmed lab equipment to carry out automation testing and reported findings to supervisor
• Documented lab findings in spreadsheet
• Oversaw the process of ensuring lab equipment was operational and functioning as intended

OTHER WORK EXPERIENCE

PHCC San Diego, San Diego, CA **January 2026 – May 2026**
Administrative Assistant
• Performed Data Entry, Managed student attendance tracking, event outreach, and facility operations for trade school programs.

Kovr Sunscreen, San Diego, California **October 2023 - April 2024**
Social Media and Marketing Professional
• Produced promotional content, video editing, and social media engagement for consumer brand.

SKILLS

Technical Skills: Testing (Black Box-Functional, Boundary, Regression, Ad-Hoc), Mobile device app testing, generating Test cases and execution of test procedures, Office 365 (Outlook, Word, PowerPoint, Excel) Test Cases, Experienced using Xcode for iOS Simulator, TestRail, JIRA, Mermaid.JS, Claude AI, Chat GPT, Debugging, LLM Chatbot Creation, AI Heuristics, prompt engineering, copilot, Visual Studio Code, Linux Fedora, Electronics, Test Equipment, Networking, IP Networks, Troubleshooting (Mobile devices and Desktop computers), IT Support, Help Desk ticket systems, Kode, HTML, Make MKV, FFMPEG, APK Reverse Engineering (apktool, smali), Android Application Compatibility Patching, SELinux Context Management, AndroidManifest.xml Configuration

EDUCATION

NFAR TECH, San Diego, CA August 2018 - April 2019

An 8-month, comprehensive vocational software training program. Curriculum includes concepts and skills necessary to obtain an entry level Software QA Tester role and prepare for the ISTQB Certificate in Testing - Foundation Level (CTFL) exam.

- Performed front-end functional testing of a peer-to-peer web application.
- Tested Bluetooth interoperability between various devices and MacBook systems.
- Performed iOS application testing using the Xcode simulator across multiple device configurations.
- Developed and executed automated website tests using Node.js, Selenium, and WebDriver.

Grossmont College, El Cajon, CA Sept 2013 – Sept 2015

Associates in Administration of Justice

Mission Bay High School, San Diego, CA June 2013

Diploma

CERTIFICATIONS

CompTIA A+ (2024)

- PC and mobile device operating system configuration, management, and troubleshooting
- Windows, macOS, iOS, Linux and Chrome OS configuration and utilization
- Hardware, software, and network troubleshooting
- Identifying and resolving security threats and vulnerabilities
- Implementing and configuring virtualization and cloud computing features

ISTQB-CTFL (2019)

AWARDS

Certificate of Competency in Graphic Design from San Diego County Office of Education
